SUMMARY

Ishaku is a Full-stack Versatile **software engineer** with over 5 years expertise in **designing, managing, and building** modern, responsive user interfaces and robust **backend systems**. Proficient in **Next.js, React Native, React, Node.js**, and various **web-development** tools. Passionate about creating efficient and scalable **applications** that deliver exceptional user experiences.

CORE COMPETENCIES

Software development, Software design, Project management, and AI automations

SKILLS

- JavaScript, TypeScript, HTML, CSS, Tailwind, React, Next.js, React Native, NodeJS, PostgreSQL, REST APIs,
- Svelte, Astro, Zustand, Tanstack, Pixi.js, Figma, Stripe, PWA, Python, Kotlin, C/C++, Java
- Git, GitHub, CI/CD, Agile (Scrum), Telegram bot, FastAPI, NestJs, Supabase, Convex, Etc

WORK EXPERIENCE

Sech Groups, Russia

September 2025 - June 2026

Team Lead

Led a team of developers building Arctur, an event planning and management platform for the Russian market. Managed task planning, architecture decisions, code reviews, and feature delivery while contributing to frontend and backend development using Next.js, React, TypeScript, Node.js, and PostgreSQL. Designed scalable solutions for event management, venue administration, ticketing, authentication, and user dashboards, working closely with stakeholders to deliver a modern, production-ready platform.

Prometheus Technologies, Russia

October 2023 - April 2025

Software Engineer

Contributed to the development of an AI-powered lead generation and email marketing platform. Built responsive user interfaces with React, TypeScript, and Next.js, while collaborating on backend services using Node.js. Integrated AI-driven workflows for customer segmentation and personalized campaigns, helping improve lead generation effectiveness by approximately 70%. Worked closely with designers and backend engineers to deliver scalable, high-performance features.

Binorix, Russia

June 2022- August 2024

Software Engineer

Delivered full-stack web applications for clients across beauty, logistics, finance, and automation. Built responsive React/Next.js frontends, developed Node.js APIs, integrated third-party services, and optimized PostgreSQL and MongoDB databases. Projects included a beauty salon booking platform, logistics management system with real-time tracking, algorithmic trading software, Telegram mining bots, and a broker platform, consistently focusing on performance, scalability, and user experience.

AWARDS AND CERTIFICATIONS

- Valedictorian, Computer Science and Math, 2016
- Awarded the BEA (Bilateral Education Agreement) Scholarship for a fully funded undergraduate degree by the Russian Federation, 2017

EDUCATION

Kazan Federal University, Russia.

General Medicine

September 2018 - June 2022

Innopolis University, Innopolis, Russia.

BSc. Data Science & Artificial Intelligence

September 2022 - June 2024
